Subject: Comments from Hank Landau

Hank called me in mid August to relay the following comments. I decided to document them by this e-mail for convenience:

708(8)(d)

(ii) Suggested the last part of this sentence be amended as follows: "...unless the department determines that there is clear and convincing scientific data which demonstrates that the use of ~~these methods~~ the selected method is inappropriate:

Table 708-1: What does "no value" mean? "zero"?

708(8)(e)

(ii) change "these methods" to "the selected method".

How are non-detects handled in the calculation?

Table 708-2: Title wrong

708(8)(f)

(ii) change "these methods" to "the selected method".

708(8)(h)

Should "science advisory board" and "department of health" be capitalized?
